SUBJECT: Weekly Report

6. The final galley proof of the new Agency telephone directory was delivered to the printer on 4 November. We expect to distribute the directories about the first of December.

7. On 7 November, American Telephone and Telegraph implemented its post-divestiture corporate structure (even though divestiture is not mandated until 1 January 1984). As a result of the changes, we are now dealing with one company for local telephone service needs; our long distance service is provided by another company; and a third company handles our equipment rental and maintenance requirements.

8. Several OC officers and officers from the DO Information Management Staff and ODP met at Wang Corporate Headquarters to discuss the CRAFT file encryption project. After initial discussions with Wang, the Agency representatives met with Simpact, our contractor for the file encryption project, and evolved two general approaches to meet the project objectives. When the approaches were discussed with the Wang representatives, they raised no objections to providing Simpact with the technical data needed to implement the options.
